

MANTSINEN INSIGHT™ STANDARD

Mantsinen Insight™ offers valuable data to improve the efficiency and productivity of your material handling operations. Automatic reporting provides a comprehensive overview of your fleet and operational status. All gathered data is available whenever needed allowing post-learning and deeper analysis. Combined with other Insight standard and option features, such as issue data and onboard diagnostics, this guarantees savings on time, costs and energy, and the best possible support for your business.

Mantsinen Insight™ is available to all Mantsinen material handlers from 2018-year-model onwards.

MANTSINEN INSIGHT™ STANDARD

- Scheduled reporting (Daily, Weekly, Monthly)
- Productivity and Efficiency views
- Visualized data (over 150 data signals)
- Scheduled maintenance documentation tool
- History data
- Global SIM-card
- Control system remote connection for Mantsinen technical support
- Sensor and fault code data for local dealer and Mantsinen technical support

SAVINGS THROUGH SCHEDULED REPORT ANALYSIS

Mantsinen Insight offers various visualized data. Following and analyzing data regularly gives valuable information on the operating habits and enables making fast adjustments and improvements. This results in savings in maintenance and fuel costs. The PDF report is sent via e-mail and can be scheduled according to your desired interval easily in the service.

MAXIMIZE MACHINE UTILIZATION WITH REMOTE SUPPORT

With Mantsinen Insight comes high quality remote support for urgent and non-urgent technical issues. Dealer and factory support can check the machine's condition, run fault diagnosis, change the machine's parameters, and even update the control system remotely. This enables fixing any issues fast and in a right way, minimizing downtime, and reducing maintenance costs.

FOLLOW UP MACHINE INVESTMENT, OPERATIONS, AND PROFITABILITY

Keeping track of machine utilization rate, actual costs, and operational profitability requires reliable data. Mantsinen Insight gathers information from over 150 outputs per machine providing transparency and real data to support decision-making, return on investment analysis and more efficient operational reporting.

INSIGHT ONSITE MONITORING EFFICIENCY AT PORT OF KOLDING

Kolding Port in Denmark uses Mantsinen Insight to check air intake, temperature levels, and oil level and to track idle time and maintenance needs. This performance data is crucial for monitoring efficiency.
